

## TCM torbocar AC52 and torbocar AC76

### The "big boy" of the torbo Units just in case

Flexibly and independently thanks to water tank, hose-reel and compressor.

With 6,2 m<sup>3</sup>/mins (**torbocar AC52**) or with 7,6 m<sup>3</sup>/mins (**torbocar AC76**), you have enough compressed air for concrete - and steel-renovation, just as the cleaning of facades with it.

With a vessel-volume of 320 Ls, you work up to 6 h per filling.

With the **torbo**-System, you reduce your overheads and save the environment!
